-  **Email**
gokulmarwal1627@gmail.com
-  **Mobile**
(+91) 8619513493
-  **Total work experience**
4 Years 1 Month

KEY SKILLS

- scikit-learn
- pattern recognition
- tensorflow
- opencv
- image processing
- deep learning
- python
- machine learning
- mysql
- natural language processing
- artificial intelligence
- computer vision
- Data Science
- Data Analysis
- AWS Databricks
- AWS RDS Oracle
- Qgis

Gokul Marwal

Senior AI Developer

PROFILE SUMMARY

AIML Developer with expertise in machine learning, generative AI, data engineering, and visualization. Proficient in Python, PySpark, SQL, and cloud platforms (Azure, AWS), with hands-on experience in building RAG pipelines, embedding models, and LLM applications using LangChain, Haystack, and CrewAI. Skilled in deploying AI solutions using CI/CD, Docker, and Azure Pipelines. Proven ability to architect data pipelines, implement data lakehouse solutions, and develop BI dashboards using Power BI and Tableau. Achieved significant improvements in automation, model accuracy, and geospatial AI applications. Delivered production-ready systems including document extractors, AI chatbots, AVMs, and multilingual translation tools. Strong communicator and collaborator, with a track record of driving impactful business outcomes across real estate, fintech, and research domains.

EDUCATION

- 2023  MCA
Jaipur Engineering College Research Center
- 2021  BCA

-  Senior AI Developer
Hornet Dynamics
Developed an AI-powered computer vision application that transforms images into responsive HTML and CSS layouts using Bootstrap, leveraging advanced deep learning models for precise UI component detection. Designed and implemented an intelligent document processing system integrating OCR, deep learning, and NLP techniques to extract structured data from PAN cards, Aadhaar cards, and Voter IDs, automating form filling and reducing manual

processing time by approximately 70%.
Built an AI-driven financial document analysis solution that extracts and organizes stock information from contract notes and stock lists, utilizing NLP and pattern recognition models to achieve over 90% accuracy in processing unstructured financial data.
Developed a multilingual AI chatbot powered by NLP and deep learning models, delivering information in users' native languages to enhance accessibility and increase user engagement by an estimated 50% across diverse linguistic regions.
Created a deep learning—based language translation system employing sequence-to-sequence models and state-of-the-art NLP architectures, enabling accurate, scalable conversion of regional and international languages into national and global languages.

AIML developer

Hornet Dynamics

Designed, developed, and maintained scalable web applications using Django framework, serving over 10 monthly users. Collaborated with frontend developers to integrate responsive designs, enhancing user experience and mobile compatibility. Implemented RESTful APIs using Django Rest Framework (DRF) to support mobile applications and third-party integrations. Used Python to automate manual processes, reducing task completion time by 40% and eliminating human error. Worked with the database to optimize queries and schema design, resulting in a 25% speed improvement in data retrieval. Introduced unit and integration testing using PyTest, achieving 95% code coverage and improving application stability. Regularly refactored codebase to follow PEP 8 standards, ensuring consistent and readable code throughout the project. Collaborated with cross-functional teams in an Agile environment, leading to efficient project delivery and a 20% increase in team productivity. Spearheaded the design and implementation of machine learning models, including SVM, Random Forest, and Gradient Boosting, leading to a 30% improvement in prediction accuracy on key projects. Leveraged deep learning techniques, utilizing TensorFlow and Keras, to develop image and speech recognition applications that now serve over 100,000 monthly users. Pioneered NLP projects to analyze textual data, resulting in a 15% increase in customer engagement and satisfaction. Collaborated with the software engineering team to integrate ML models into scalable AI applications, benefiting both internal operations and external clients. Conducted advanced exploratory data analysis using Pandas and NumPy, uncovering insights that shaped product development and strategic planning. Streamlined the data preprocessing pipeline, employing techniques like feature scaling, normalization, and encoding to enhance model performance. Evaluated model performance using metrics like RMSE, AUC-ROC, and F1 Score, ensuring models met business objectives and performance benchmarks. Kept abreast of cutting-edge ML and DL research, continuously integrating innovative techniques into the company's analytics toolkit.

COURSES & CERTIFICATIONS

- Advance data analyst professional
- Competitive coding with data structures - IIT Kanpur
- Python
- SQL (Intermediate)

- 
- Data Analytics Virtual Experience
 - C++
